- 180 degree sprung flap
- Part of the Yale suited door furniture range
- Corrosion tested to 240 hours

Finishes

- White
- Black
- Anodised Gold
- Anodised Silver
- Polished Gold
- Polished Chrome

A front door is a focal point of most properties and the hardware should reflect this. The Trojan letter plate has been designed very much with aesthetics in mind with its simple but elegant styling, designed to complement any door. This combined with being able to apply high polished chrome and PVD gold finishes, gives a quality appearance with extremely high corrosion resistance and UV stability. Much of the engineering is also improved with a stainless steel torsion spring rather than a conventional plastic type that is prone to loose strength or break.

Key Product Features

- A unique and elegant design with no unsightly plastic surround.
- Letter flaps are made from stainless steel for ultimate corrosion resistance.
- Flaps open to 180 degrees, thus eliminating any excess leverage on pivot points.
- Stainless Steel return spring to ensure a continuous positive action.
- External flap has a complete peripheral seal that also forms a full thermal and acoustic barrier.
- Cycle tested to 100,000 operations.
- Available in a full choice of finishes, to suit with the Sparta door handle which includes Polished Chrome, PVD Gold, Black and White.
- Detachable clamping screw boss for alternative direct face fixing to panel.
- 40-40mm and 20-20m configuration available to suit doors from 20mm up to 70mm thick.

Testing And Accreditation

Corrosion Test

UKAS laboratory tested to BS EN 1670:1998 to grade 5 classification (480 hrs salt spray).

Cycle Test

Opening and closing action of flap tested to 100,000 Cycles.

UV Test

Independent laboratory tested to ISO4892 part 3.

Weather Test

In house tested in line with BS EN13724:2002.

Abusive Pull Test

In tests where a load is applied to the letter flap to simulate someone pulling a door closed. The Trojan letter plate achieves loads in excess of twice that of conventional plastic pivot / torsion spring designs.
